PROFESSIONAL EXPERIENCE

OMC International

Senior Software Engineer (Aug 2026 – Present)

- Lead technical design and delivery of cross-platform web and mobile applications (React, React Native, Rails on AWS), mentoring engineers within a 7-person team, reviewing architectural proposals, and coordinating delivery for port authorities.
- Architected an event-driven orchestration platform using Prefect and FastAPI, processing 250,000+ operational events monthly across 9 microservices.
- Led team-wide adoption of AI-assisted development and testing workflows, reducing code review time by 40%, feature delivery time by 20%, and reported bugs per sprint by 54%.
- Built an internal AI investigation tool using MCP servers integrated with 9 services, reducing on-call investigation time by 30%.

Software Engineer (Dec 2021 – Aug 2026)

- Established AI-assisted development workflows that resulted with team-wide adoption.
- Engineered a WebSocket-based communication layer enabling real-time, bidirectional vessel and scheduling updates for port authority users.
- Delivered 100+ features for a flagship product generating approximately $10M in annual revenue, primarily using .NET Core and React.
- Automated regression testing with Playwright and Buildkite, reducing QA execution time from 2 days to minutes and enabling tests on every merge.
- Developed .NET 8 microservices handling 50,000+ daily requests with 99.94% uptime.

Shopee

Software Engineer Intern (Dec 2019 – Feb 2020)

- Redesigned API-to-database interactions, improving production read/write performance by 300%.
- Automated Graylog infrastructure scaling on Google Cloud using Terraform and Ansible to reduce off-peak VM costs; developed a Go/MySQL REST API with JWT authentication.

PROJECTS

embAdded — Direct ad placements

- Independently built and launched an early-access advertising marketplace using FastAPI, PostgreSQL, React, TypeScript, and React Native.
- Implemented secure ad placement booking and delivery, including database constraints to prevent overlapping bookings, access controls, and automated scheduling.

EDUCATION

University of Melbourne

Bachelor of Science, Major in Computing and Software Systems

CERTIFICATIONS

AWS DevOps Engineer – Professional (Expires 2028)

AWS Certified Developer – Associate (Expires 2028)

TECHNICAL SKILLS

Languages: C#, TypeScript, JavaScript, Python, Ruby, Go, SQL

Frameworks: .NET Core, .NET 8, React, React Native, FastAPI, Ruby on Rails

Cloud & DevOps: AWS, Google Cloud, Terraform, Ansible, Buildkite, Playwright, Prefect

Architecture & Data: PostgreSQL, MySQL, REST APIs, WebSockets, Microservices, Event-Driven Systems

AI Engineering: MCP Servers, AI Tool Integration, AI-Assisted Development and Testing
